

**Commonwealth of Virginia Enterprise Storage IFB 2010-20-N**

**Price List**

**Supplier Name:**

PLANIT Technology Group, LLC

**Supplier Contact:**

Nigel Buttery, 757-313-6500, nigel.buttery@planettech.com

**BRAND:**

NetApp

Instructions: In the table below, you are required to submit a Price List for Network Attached Storage (NAS) products, h/w, s/w & services (services may include, but are not limited to, maintenance, installation, training, and integration of this procurement that you are interested in selling to the Commonwealth. One Brand per bid.

In order to complete this table first indicate the "Index Price List Source" and "Effective Date" in the colored fields above the table. In the space provided, you should indicate the source of the products and Index prices that are identified (shaded yellow) has been provided for you.

After completing the source and date fields, you should proceed to the Price List table where you should identify all products that you would like to include in your offer in response to this IFB. All products must fall within the scope of the products and services that may be required in order to fulfill a request for a comprehensive storage system. In other words, offers should include software, maintenance, installation, cables, switches, etc. as applicable.

For each product, identify the product category, your product # (if different than manufacturer product number), manufacturer, manufacturer product number, detailed product description, index price, discount percentage, and net price identify separate pricing for academic and government customers (if academic pricing is not provided, government pricing will apply to academic Authorized Users). Some offers may opt to hold the index price the same while offering academic and government customers. Others may offer different index prices and hold the percent discount the same, and some vendors may wish to offer different discounts and different index prices for academic vs. government customers constructed in such a way that you can arrange pricing differentiation between academic and government customers in any way you see fit.

The net price offered for any individual product in the Price List may go up or down based on market price fluctuations, since the Percentage Discount remains constant. Therefore no price escalation will be permitted during the life of any subsequent renewals.

Offers should construct discount percentages that are consistent across all products within a product category. In other words, if you indicate "cables" as being one of your product categories, then a 30% discount (for example) would mean that all products within that category need not be the same across product categories. For example, cables may be subject to a 30% discount while switches are only 20%.

You may construct product categories in any way you see fit. For example, you may construct your categories by product type, by part type (e.g. Disk, Cable, Switches, Software), by product line, or any other combination.

The Percentage Discount(s) that is offered for any product category will be maintained throughout the life of the contract.

New Product/Price Lists that are published subsequent to the initial Price List may include new products, but new products will be subject to the same percentage discount-off-index offered in the original Price List proposal for that product category.

All discounted pricing must reflect required eVA and Industrial Funding Adjustment (IFA) fees and shipping that is F.O.B. Delivered to the specified destination/location and include any and all shipping costs.

The Price list submitted by bidders must be a widely-used, publicly available price list that has a consistent basis of calculation and is available throughout the life of the contract. The net price indicated in the Price list is a "not-to-exceed" price. The price list must be more competitive than this price for a specific purchase or a specific authorized user, but pricing shall never exceed the net price indicated in the price list.
